SWAPNIL SONAWANE

DEVOPS ENGINEER | AWS | AZURE | GCP | KUBERNETES | DOCKER | JENKINS | TERRAFORM | ANSIBLE | LINUX

Pune, Maharashtra, India | +91-9552924007 | swapnil.sonawane4007@gmail.com

PROFESSIONAL SUMMARY

DevOps Engineer with 6 years of overall experience, including 4 years hands-on experience in DevOps, cloud operations, infrastructure support, CI/CD, containerization, Kubernetes, Linux administration, automation, and production support. Experienced in designing and supporting CI/CD pipelines, containerizing applications, deploying workloads, troubleshooting production environments, and automating repetitive operational tasks. Hands-on experience with AWS services including EC2, S3, IAM, VPC, and CloudWatch, with practical project exposure to Google Cloud Platform (GCP) including Compute Engine, Cloud Storage, VPC, IAM, Cloud Monitoring, and Google Kubernetes Engine (GKE). Strong focus on reliable deployments, incident resolution, system stability, infrastructure automation, monitoring, and collaboration with development and operations teams.

CORE TECHNICAL SKILLS

Cloud Platforms:	AWS, Microsoft Azure, Google Cloud Platform (GCP)
AWS Services:	EC2, S3, IAM, VPC, ECR, EKS, RDS, CloudWatch
Microsoft Azure:	Azure Virtual Machines, Azure Storage, Azure Resource Groups, Azure Virtual Network, Azure IAM/RBAC, Azure Monitor, Azure Kubernetes Service (AKS)
Google Cloud Platform (GCP):	Compute Engine, Cloud Storage, VPC, IAM, Cloud Monitoring, Google Kubernetes Engine (GKE)
CI/CD & DevOps:	Jenkins, GitHub Actions, Git, CI/CD pipeline design, build and deployment automation
Containers & Orchestration:	Docker, Kubernetes, Docker Swarm, containerized application deployment
Infrastructure as Code & Automation:	Terraform, Ansible, Bash scripting, Python automation
Operating Systems:	Linux, RHEL, Ubuntu, CentOS
Web & Networking:	Nginx, Apache, DNS, TCP/IP, VPN, networking troubleshooting
Monitoring & ITSM:	AWS CloudWatch, GCP Cloud Monitoring, SNOW, incident management, change management, problem management
Enterprise Support:	Active Directory, Office 365, production support, troubleshooting, deployment support

PROFESSIONAL EXPERIENCE

DevOps Engineer | Mphasis Limited | Dec 2023 – Aug 2026 | Pune, India

- Designed, configured, and supported CI/CD pipelines using Jenkins, Git, and GitHub Actions to automate application build, test, and deployment workflows.
- Worked hands-on with Docker to build application images, manage containers, and standardize application deployment across environments.
- Deployed and supported containerized workloads in Kubernetes environments; investigated pod, node, service, and deployment issues and worked on production stability.
- Worked hands-on with AWS infrastructure including EC2, S3, IAM, VPC, and CloudWatch for compute, storage, access management, networking, monitoring, and operational support.
- Administered Linux servers and performed troubleshooting related to CPU, memory, disk, processes, services, networking, permissions, logs, and application availability.
- Automated repetitive operational activities using Bash and Python scripts, reducing manual effort and improving consistency of routine tasks.
- Used Terraform for infrastructure provisioning and configuration, with practical exposure to reusable modules and Infrastructure as Code practices.
- Used Ansible for configuration management and operational automation across Linux environments.
- Implemented Git branching and version-control practices and coordinated source-code changes with development and operations teams.
- Supported production deployments, monitored system health, investigated incidents, performed root-cause analysis, and contributed to preventive actions.
- Worked with Nginx as a reverse proxy for application deployments and supported web/application connectivity troubleshooting.
- Collaborated with developers, infrastructure teams, and operations teams to resolve deployment failures and improve application reliability.

Junior DevOps Engineer | Tata Communications Limited | Oct 2022 – Nov 2023 | Pune, India

- Provided L1/L2 infrastructure and application support in a 24x7 production environment, with hands-on troubleshooting of Linux and enterprise systems.
- Supported CI/CD workflows, monitored deployments, investigated deployment issues, and assisted with automation activities.

- Worked with SNOW for incident, change, and problem management and followed production support processes.
- Supported DNS, VPN, Active Directory, Office 365, Linux systems, and enterprise connectivity issues.
- Collaborated with senior engineers to troubleshoot incidents, improve system stability, and maintain service availability.
- Developed practical exposure to DevOps tools, cloud operations, production monitoring, and deployment support.

Quality Engineer | New India Cuprotec Pvt. Ltd. | Aug 2019 – Jan 2021 | Silvassa, India

- Responsible for product quality, defect matrix, skill matrix, work instructions, process flow charts, PPM, CAPA and 8D reports.

Project Head | Sentinel Engineering Services Pvt. Ltd. | Mar 2018 – Jan 2019 | Rajkot, India

- Worked on APQP, PPAP, MSA, SPC and FMEA for new parts or changes in existing processes.
- Conducted Internal, Dock, Process, Part and Vendor Audits.

PROJECTS & HANDS-ON EXPERIENCE

1. GCP Cloud Infrastructure & GKE Deployment – Hands-on Project

- Provisioned a Google Cloud environment using Terraform, including a custom VPC, subnets, firewall rules, IAM roles, and Compute Engine resources.
- Deployed a containerized application on Google Kubernetes Engine (GKE) and configured Kubernetes Deployments, Services, namespaces, and environment-specific configuration.
- Built and stored Docker images in Google Artifact Registry and used Git-based CI/CD practices to automate application build and deployment workflows.
- Configured Google Cloud Storage for application artifacts and backups, applying IAM-based access controls and least-privilege practices.
- Used Cloud Monitoring and application logs to monitor CPU, memory, pod health, service availability, and troubleshoot deployment/runtime issues.
- Automated Linux and Kubernetes operational tasks with Ansible and Bash, improving repeatability across environments.

2. AWS EC2 Application Deployment with Docker, Nginx & CI/CD

- Worked on deployment of a PHP Yii2 application on AWS EC2 using Docker-based application packaging and Nginx reverse proxy.
- Configured containerized application services and supported application connectivity, deployment, and troubleshooting.
- Used Git/GitHub for source-code management and GitHub Actions for CI/CD automation.
- Applied Ansible automation for repeatable configuration and deployment-related operational tasks.
- Monitored application and infrastructure health and investigated deployment or runtime issues.

3. Kubernetes Cluster Deployment & Troubleshooting

- Worked hands-on with Kubernetes clusters running on Linux virtual machines and supported master/worker node operations.
- Troubleshot Kubernetes issues including NotReady nodes, pending networking pods, kubelet failures, and node registration problems.
- Used Kubernetes and Linux troubleshooting commands to inspect pods, nodes, services, logs, workloads, and cluster health.
- Worked with containerized applications and supported deployment, service availability, and runtime troubleshooting.

4. Infrastructure Automation with Terraform & Ansible

- Created and used Terraform configurations/modules for repeatable infrastructure provisioning.
- Used Ansible playbooks for Linux configuration, operational automation, and repeatable administrative tasks.
- Focused on reducing manual configuration effort and improving consistency across environments.

EDUCATION

Bachelor of Engineering (Mechanical Engineering) | North Maharashtra University | 2016

CERTIFICATIONS & TRAINING

- AWS DevOps Fundamentals
- Docker & Kubernetes Certification
- Jenkins Certification
- Linux Administration
- Python for Automation
- CCNA

PROFESSIONAL STRENGTHS

Hands-on troubleshooting | Production support | CI/CD automation | Cloud operations | Infrastructure automation | Incident resolution | Root-cause analysis | Cross-functional collaboration
